“The Use of AI in teaching and learning: opportunities and risks”

20 March 2023 (11.00-13.00 CET)

[Registration link](#)

This workshop aims to raise awareness about the implications of artificial intelligence (AI) use in teaching and learning. It will bring together perspectives of developers, teachers, and students, allowing for an exchange but also a short experiential time with a generative AI tool. The workshop will be an occasion to reflect on the opportunities and risks of such disruptive technologies in education, ultimately focusing on the intrinsic nature of teaching and rethinking the future role of teachers in a generative AI world.
